The Advocacy Strategy for the EU Integration of the Western Balkans – Guidelines (www.wb6.info) resulted from the project “V4 - Backing the Advocacy Strategy for the European Integration of the Western Balkans” whose goal is to develop the advocacy strategy for the Western Balkan countries, which would facilitate the EU enlargement towards this region and make it faster and more efficient. The overarching message is that the enlargement has been put on hold and that a strong lobby for the Western Balkans is needed more than ever before.
